

The AV Platform That Evolves with Your Needs

Cbox future-proofs your technology investment by solving your current presentation & lecture capture challenges and adapting to requirements down the road. As technology changes, you'll need a flexible solution that evolves just as quickly. From automated recording & publishing to multi-camera productions, Cbox integrates into any AV environment and with any content management solution, making deployments and life simple for your AV & IT staff.

Performance & Flexibility

- Connect to a wide range of input options to capture multiple HD video and audio sources simultaneously for the ultimate rich media experiences
- Customize layouts to optimize playback experiences for the web and mobile devices
- Support for many popular archiving and streaming formats lets you produce independent recordings and live streams to meet your specific requirements

Ease of use & Automation

- Easily create high-quality HD video content with an intuitive user interface
- Leverage digital I/Os and triggers to automatically enhance in-room productions
- Automate your workflow with a recording scheduler and advanced publisher to seamlessly upload rich media content to your CMS and LMS video libraries
- Eliminate post-production work by auto-indexing chapters, thumbnails and searchable text in real time

Low Cost of Ownership

- Built-in video switching, audio mixing, PTZ camera control, and multiple encoders
- Integrates with existing AV equipment and room control systems
- Winnov integrates with 3rd party software and services enabling you to choose solutions that best fit your needs and budget
- Remotely monitor, manage and support deployments with Cbox Command Center
